

## Productivity training led by industry Experts

Our chosen experts transfer and accelerate capabilities to make Enterprise Architecture, Project Management, Business Analysis and Software Architecture become a smooth running repeatable process. We have delivered successful outcomes to our clients during large-scale transformation projects by using reuse architecture deployments and training in open best practice techniques using productivity tools like Sparx Systems Enterprise Architect since 2001. Our clients say “we offer thoughtfully designed training solutions” guaranteed to meet your immediate enterprise or project needs and budget.

### CONSULTING - TOGAF® and Requirements Management Deployments

At INTEGRATE iT we provide clients with complimentary access to our custom-built, integrated framework and repository – a valuable software library with dozens of reusable role-based model patterns, stencils, framework structures, re-use catalogs, and modeling-related help screens – resources that can save literally months of “re-inventing the wheel” time over the course of a major corporate project:

- Allow for project standardization and governance
- Avoid costly project delays
- Deliver business value within weeks not months or years
- Empower your team to succeed the first time
- Guarantee rigorous tool deployments to avoid major pitfalls and massive failures
